

**Patient Name:** Mark Doe**Date:** 2025-12-27 00:41**Patient Age:** 45**SAFETY ALERT DETECTED**

WARNING: Penn scene medicine (presumed to be an antibiotic) has not been explicitly identified in the Patient History as a specific allergy. However, it is often used as an alternative to Penicillin due to similar efficacy and potential cross-reactivity.

Given that the patient has a severe allergy to Penicillin and considering Penn scene medicine may contain penicillin derivatives, this could be considered a problematic choice without further evaluation of the medication's specific formulation and composition.

More information about the exact nature of "Penn scene medicine" is needed to make an accurate determination of safety.

**CONSULTATION NOTES (SOAP)****SOAP Note:****SUBJECTIVE:**

Patient presents with a concern about medication for a Pac-2.

**OBJECTIVE:**

- Vital signs: Not mentioned
- Physical exam findings: Not mentioned
- Medication order to be given, but no lab results or other objective data are provided.

**ASSESSMENT:**

Potential diagnosis of pediatric illness requiring antibiotic treatment. Further assessment and diagnostic testing may be needed based on patient's specific condition.

**PLAN:**

- Prescribe Penn scene medicine for Pac-2
- Continue treatment for a week
- Change to alternative medication as necessary
